- Advance CertaDrive LED drivers are manufactured to engineering standards correlating to a designed and average life expectancy of 50,000 hours
  of operation at maximum rated case temperature. Minimum 90% survivals based on MTBF modeling.
- Note: power factor (PF) and total harmonic distortion (THD) may deviate under adverse mains voltage conditions outside nominal operation. Output current (I out) variation includes effects of line and load regulation, temperature variation and component tolerances.

#### 0-10V Dimming Curve

Dimming source current from the driver:  $150\mu A$  (@ 0<Vdim<8V)

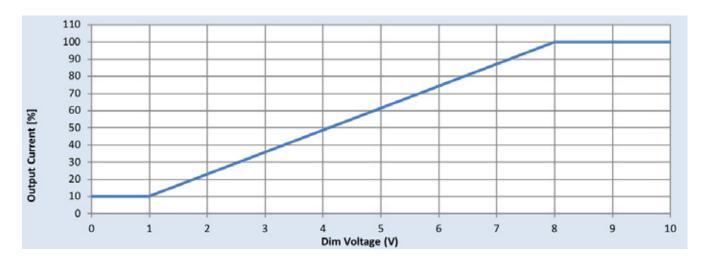

Minimum dim level: 10% of lout

Maximum output voltage on the dimming wires: 12V

The dimming lead leakage current is 0.01mA. The maximum number of drivers that can be connected in parallel to one dimming control circuit is based on this dimming lead leakage current and the calculation is described in the corresponding Design-in Guide.
