Connected Emergency Lighting

Emergency

FirstLink

Bodine

Emergency Lighting must be tested.

Emergency lighting is a crucial life safety system. More than "path of egress", it provides security during times of uncertainty.

Quality emergency lighting also assists first responders in dangerous situations and unfamiliar locations.

**Reduce compliance
costs**

**Simplify testing
& reporting**

**Schedule system
testing**

What is FirstLink?

FirstLink is the best way to make sure your emergency lighting system is emergency ready. It is a complete and fully code compliant emergency egress lighting system, comprised of FirstLink enabled exit signs, wall packs, emergency LED drivers and the FirstLink app.

The FirstLink app provides easy and instant access to the status of your system. Simply open the FirstLink app to view and download the condition of all FirstLink devices. Reports can be saved and easily exported to prove the system is 100% compliant.

bodine.cc/FirstLink

Know the status of your system at all times and maintain your emergency lighting system's compliance with virtually zero effort.

Testing is mandatory.

FirstLink is the best way to test.

What can FirstLink do for you?

Compliance

Avoid costly non-compliance fines. FirstLink components automatically perform all required testing. The FirstLink app downloads the status of all FirstLink devices and creates a report which can be easily exported or emailed.

Convenience

No ladders, no pushing buttons (unless you want to), **no documentation, and no searching for reports** during an inspection. FirstLink emergency lighting system components can easily be installed and configured in the field by the contractor or end user, making it truly field install friendly.

Control

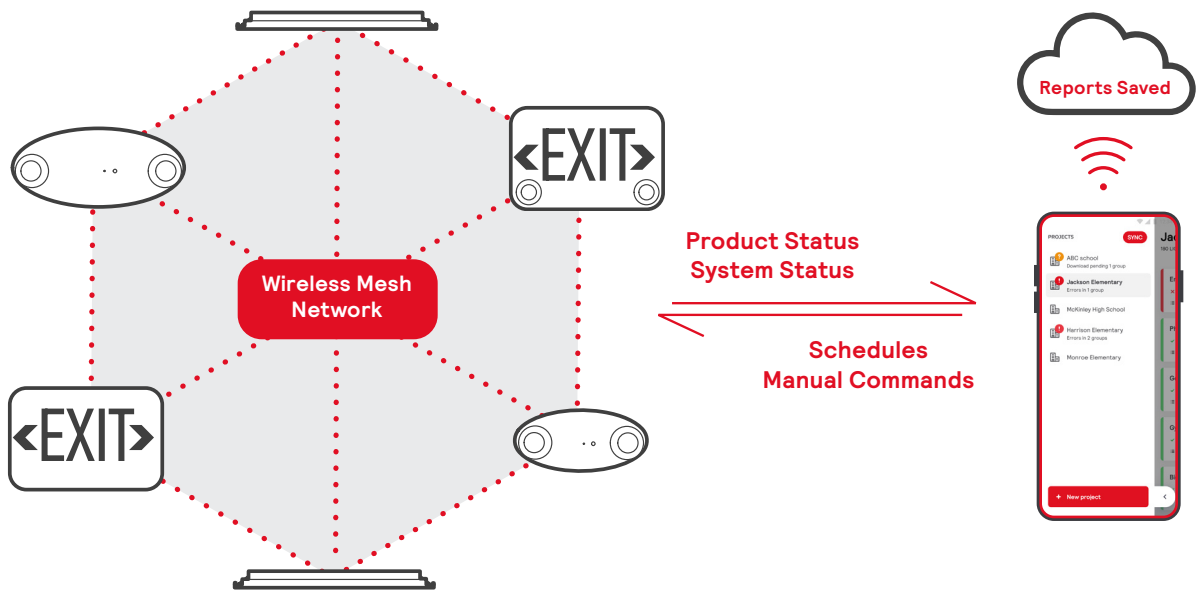

FirstLink is more than just a reporting system:

- **Scheduling:** Adjust the frequency and timing of testing.
- **Troubleshooting:** Receive complete product status information.
- **Customization:** Create custom groups and zones, add or remove devices as needed, and work collaboratively with others through project sharing.

Test with the push button, automatically scheduled self-test, or modify the schedules on a group by group basis, to ensure tests run exactly when you want.

How does FirstLink work?

FirstLink is a standalone wireless system which integrates all necessary emergency lighting components with an app installed on a tablet or smartphone.

A wireless mesh network connects all devices and ensures a reliable connection through the network, even during loss of individual devices. If the app can communicate with just one device, the status of all devices can be read.

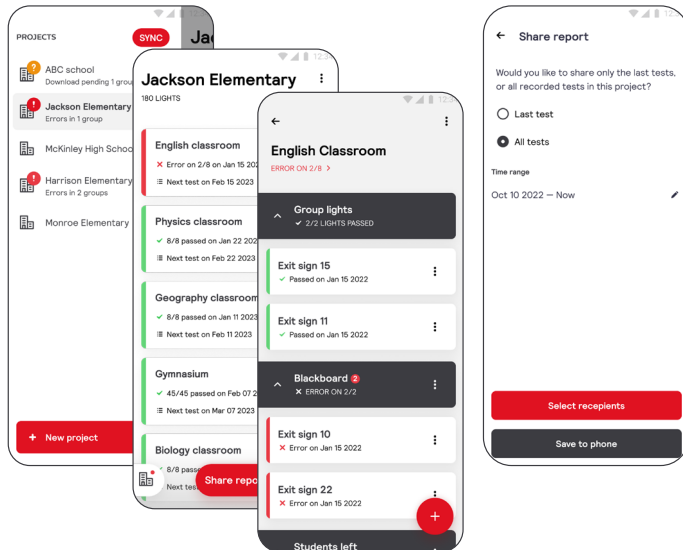

Once the status is downloaded, the data is uploaded and saved to the cloud.

The FirstLink App

Complete control is in your hands

See the complete system status instantly and easily export and share test data

And also:

- Set a custom schedule
- Manually start a test on a group, zone, or device
- See product details
- Work collaboratively with other users
- Add/remove lights as needed
- Identify products through flashing of the luminaire
- Customize your install through the addition of zones and renaming of lights.

The FirstLink app is your portal to the FirstLink system. This easy-to-navigate iOS and Android application gives you the ability to configure your system, view and export results, change testing schedules, and more.

New products, accessories and features will be regularly added. No need to update the FirstLink hardware already present in the building.

The FirstLink Hardware

Everything for a complete emergency egress lighting system

BSL10T4FL

Output Voltage: 15 - 54 VDC
Output Power: 10.0 W Initial (regulated)
Dimensions: 16.6" x 1.18" x 1.0"

BSL06T3FL

Output Voltage: 15 - 54 VDC
Output Power: 6.0 W Initial (regulated)
Dimensions: 14.1" x 1.18" x 1.0"

BXA (exit) & BCA (combo)

(AC+Battery Backup)

Mounting: Universal Wall, Ceiling, or End
Sign Color: Red or green, single or double-sided
Dimensions: 13.75" x 8.7" x 2.13"
Spacing (combo): up to 76'

BLK1000FL

Included: Emergency Driver, LED Module, Wires, Screws
Initial Lumens: 1000 lumens +
Driver Dimensions: 14.1" x 1.18" x 1.0"
Module Dimensions: 5.0" x 1.0"

BUA1WFL1

Spacing: up to 40'
Mounting: Wall or Ceiling
Dimensions: 7.13" x 4.75" x 2.63"

BUA2WFL1

Spacing: up to 76'
Mounting: Wall or Ceiling
Dimensions: 10.255" x 4.75" x 2.63"

All products are UL Listed for field installation to UL924, the standard for emergency lighting and compliant with California CEC Title 20 or DOE energy standards (as applicable).

FirstLink Support: Bodine's support team is available to help with your projects and questions, both big and small.
